

Technician II – Job Posting

“Rare opportunity to use your technical skills to join a growing audio visual industry and continue your career growth as a technician-2 with our audio visual division.”

MidPoint Technology Group, LLC is a technology design & integration company headquartered in Baltimore Maryland and provide services to their national clients. MidPoint Technology Group, LLC was founded in 2014 as a technology services company providing solutions in the audio visual, data center, electronic security, managed IT and structured cabling markets. MidPoint Technology Group, LLC is currently seeking an audio visual technician-2 to join our growing audio visual division to work with our technical staff and installation staff.

Working in concert with our foreman and lead technicians, the audio visual technician-2 we select will have overall responsibility for supporting the technical team with their daily tasks. An audio visual technician-2 is an intermediate technical position within the audio visual department, this position is great for candidates with 2-plus years of experience in the electronics and audio visual industry.

The collaborative audio visual team member we seek will genuinely respect diverse points-of-view, acceptable to directions, self-motivated and strive for an environment in which inclusiveness drives productivity and results. Other requirements include:

- 2-years (plus) experience integrating large scale audio visual systems
- General mechanical skills
- Ability to follow directions
- Ability to lift 75lbs
- Cable installation
- Cable termination
- Device installation
- Trouble shooting skills
- General computer skills
- General network skills
- Organizational skills
- Ability to read & understand cabling pull schedules, floor plans, ceiling plans, riser diagrams & line diagrams
- Knowledge of signal flow, audio visual signal types, connector types & terminations
- Knowledge/experience with control/automation system: Crestron, AMX and Extron
- Knowledge/experience with audio DSP's: QSC, Biamp, Clearone, Symetrix
- Knowledge/experience with digital multi-meters & impedance meters
- Knowledge/experience with digital video/audio transmission and protocols
