

Trades Helper – Job Posting

MidPoint Technology Group, LLC is a technology design & integration company headquartered in Baltimore Maryland and provide services to their national clients. MidPoint Technology Group, LLC was founded in 2014 as a technology services company providing solutions in the audio visual, data center, electronic security, managed IT and structured cabling markets. MidPoint Technology Group, LLC is currently seeking an audio visual trades helpers to join our growing audio visual division to support our technical staff.

Working in concert with our foreman and technicians, the audio visual trades helper we select will have overall responsibility for supporting the technical team with their daily tasks. An audio visual trades helper is an entry level position within the audio visual department, this position is great for mechanically inclined people and has tons of potential for advancement.

The collaborative audio visual team member we seek will genuinely respect diverse points-of-view, acceptable to directions, self-motivated and strive for an environment in which inclusiveness drives productivity and results. Other requirements include:

- General mechanical skills.
- Ability to follow directions.
- Ability to read cabling pull schedules.
- Ability to lift 75lbs.

Additional skills:

- Electronics knowledge is a plus.
- Other trade experience is a plus: Electronic security, fire alarm, structured cabling, electrical, etc.
- Computer skills is a plus.

This position may require travel and the ability to work nights and/or weekends to meet the project(s) demands. For additional information about this position, please contact our human resources department.
